

Risk and Compliance Support Service of the Year

This category is open for suppliers of risk and compliance products and services to law firms.

COLP's/HOLP's and COFA's/HOFA's jobs are not easy. It can feel as though risk and compliance is a constant concern with the spectre of Professional Indemnity Insurance continually hanging over their every move.

This category recognises the organisations who seek to remove some of the compliance burden, providing risk and compliance solutions to conveyancers and law firms and in turn making the lives of their users easier, more productive and crucially more compliant.

Criteria

This organisation must demonstrate over the last 12 months:

- Innovation in the way their product or service supports an element of risk and compliance.
- Demonstrable improvement in process and procedure to improve performance (speed/accuracy/compliance)
- Evidence of commitment to users to keep them up to date with regulatory changes and embedding risk and compliance within the culture of the business.
- Evidence of industry adoption and/or recognition.
