

Supporting the Industry Award

Entries for Supporting the Industry Award are for organisations who provide support/ancillary services to the property industry ONLY.

There's no "I" in "Team" so the saying goes. This award recognises the team and/or organisation who are changing the way we deliver conveyancing services, or supporting the industry by incubating or delivering innovation, technology and service excellence. Rather than any one innovation, this team or business is making its client's lives, whether they be law firms, legal suppliers or ancillary services, easier on a daily basis and work collectively to make a genuine difference to how their clients do business.

Criteria:

This team or organisation must demonstrate over the last 12 months:

- Track record of supporting the delivery of innovation, technology and service excellence.
- How the proposition has improved the end user's performance, professionalism and service delivery.
- Evidence of commercial benefit to the end user on adoption of the innovation, technology and/or service.
- A desire to provide selfless support to the benefit of their customers.
